

SPEAKER WIRING INSTRUCTIONS

TIC Subwoofer

- Red = Right input (+) } Connect to amplifier right channel speaker outputs
- Black = Right input (-)
- Blue = Left input (+) } Connect to amplifier left channel speaker outputs
- Yellow = Left input (-)
- Red = Right output (+) } Connect to right channel mid/high speakers
- Black = Right output (-)
- Red = Left output (+) } Connect to left channel mid/high speakers
- Black = Left output (-)

8" Rock Speakers

- Brown = Positive input (+)
- Blue = Negative input (-)

If using as stand-alone speakers, connect the first speaker's Brown to the amplifier right channel speaker output positive (+) and the Blue to the right channel speaker output negative (-). Then connect the second speaker to the left channel speaker output in the same manner.

If using with a TIC Subwoofer, connect the first speaker's Brown to the Red (+) from the subwoofer, and the Blue to the Black (-) from the Subwoofer. Then connect the second speaker to the left channel from the Subwoofer in the same manner.
